Nandani

WEBSITE DESIGNER AND DEVELOPER

ABOUT

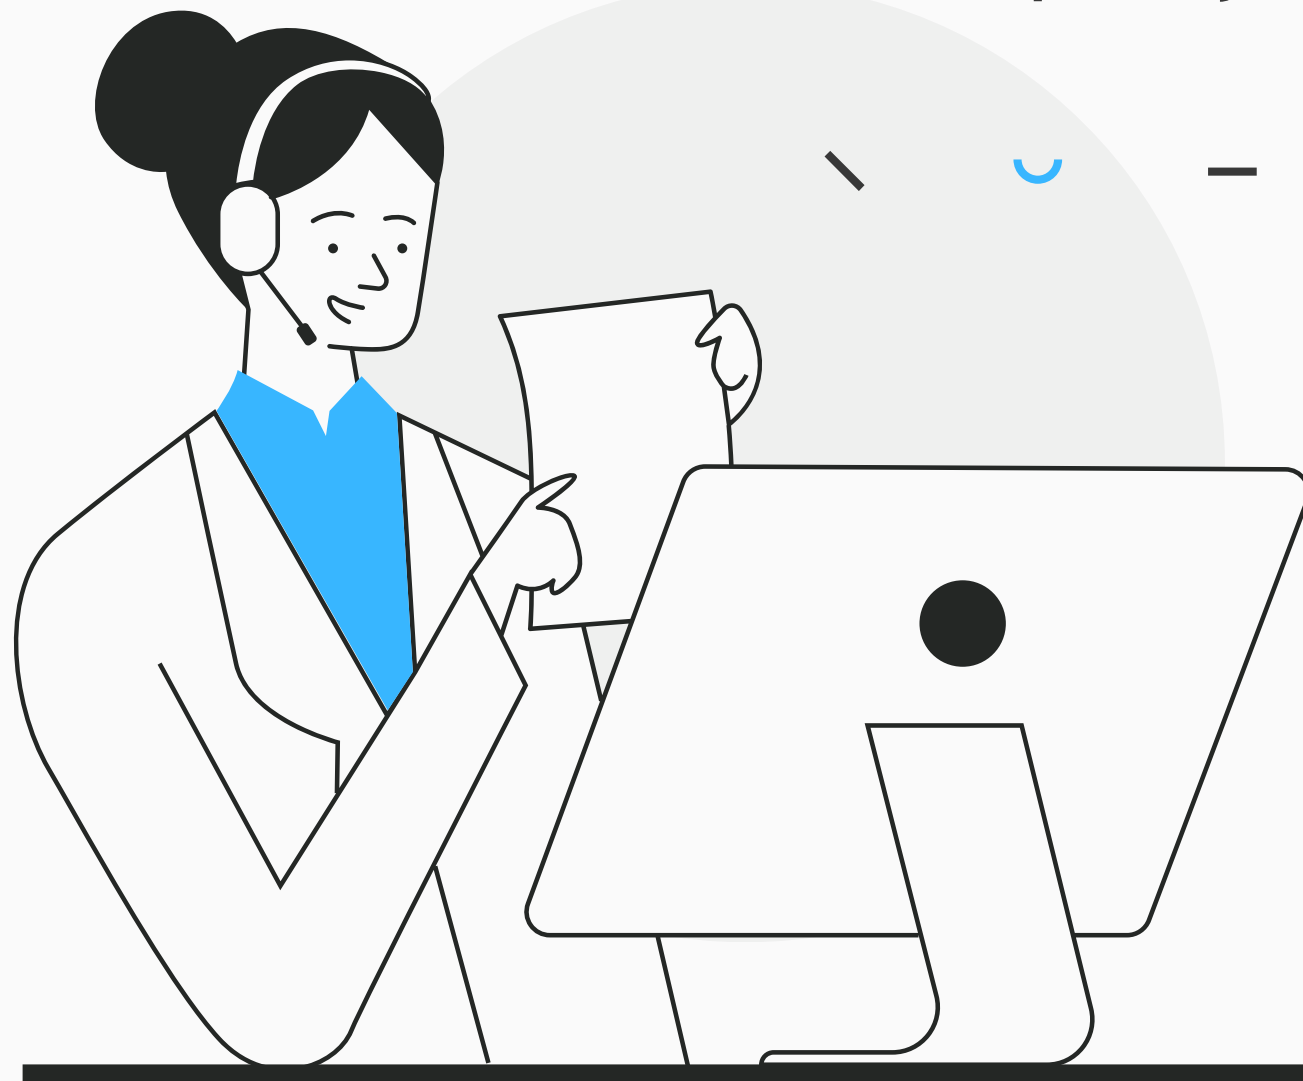

I'm a web designer and developer belong from Delhi. I can create all type of website and also ecommerce website. My designs are responsive and all screen friendly. I believe in to making trendy and modern designs. I am experienced person in this field.

Why I switched to my job

I decided to change jobs for a number of reasons, all of which reflect my changing career ambitions and desires. In order to advance my knowledge and talents, I first looked for a new challenge and a different setting. Even though my prior position gave me great experience, I felt that my professional development had stopped, and I wanted a change. By changing jobs, I may investigate new possibilities, get knowledge from various viewpoints, and develop my competence in fields that are more in line with my interests and long-term objectives.

I also wanted to seek a job that offered a better fit with my principles and interests. I came to the realisation that my prior position did not properly utilise my genuine talents and areas of passion via self-reflection.
