PROFILE

As a dedicated and ambitious BCA student with a passion for web development, programming, and computer management, I am seeking opportunities to contribute my skills and learn from experienced professionals. My goal is to become a software engineer after gaining valuable development experience.

PROJECTS

- **1. 'Fee Management System' (Python, Tkinter, SQL)**
 - Designed and implemented a secure Fee Management System using Python, Tkinter, and SQL for efficient fee tracking.
 - Enhanced user experience with a Tkinter-based GUI, optimizing data entry and generating comprehensive reports for informed decision-making.
- **2. News Management System (Django, React, SQLite3)**
 - This project uses react and context api to manage the state of the application
 - This project uses drf as backend and use sqlit3 as database.
 - This app has features to filter articles based on the category of the article and search for articles.

Certifications

- **Python Training:**
 - Python Training, In Dayanand Academy Of Management Studies, Completed a rigorous 2-month training program in Python programming, covering advanced concepts and applications.

Interests

- Problem-Solving Challenges
- Web Development
- Programming
- Computer Hardware
- Photo and Video Editing
